

Test Smarter. Scale Faster. Pay Less

Anritsu
Advancing beyond

Get 400G Capability — Pay Only for 100G

Unlock full 400G test power at a 100G price point.

No hidden licenses. No gimmicks. Just smarter test investment.

The Anritsu MT1040A Network Master Pro is a high-speed portable tester built for Optical Networks demanding minimal downtime. The Anritsu Network Master Pro offers flexibility to test today's high speed networks from 10G through 400G data links. Rugged, responsive, and precise — it's more than a tool, it's your test advantage.

► 10G Lite – Starting at \$20K

Dual port 100Mbps - 10GE for fast turn-up, field upgradable to 100GE

Built for access techs, contractors, and utilities.

Ideal for last-mile validation, GPON, and backhaul

► 100G Field Bundle – Starting at \$30K

Designed for metro builds, regional telcos, and public infrastructure.

Full dual-port 100G test set with 25G and 10G support

Execute RFC 2544 and Y.1564 on live links with SLA tracking

Request a Quote

► 400G Enabled – Starting at \$46K

High-Speed Dual port 100GE, with 400G QSFP-DD enabled

Perfect for DCI, hyperscale, and AI cluster rollout.

400G link testing, CMIS 5.2 diagnostics, FEC margin analysis

Validate ZR/ZR+, OSFP/QSFP-DD links and ROADM path

Let's Talk **Virtual and in-person demos available.**

No more guesswork. No more waiting. Whether you're launching a new metro ring, scaling a data center, or troubleshooting ZR+ links — we'll meet you where you are.
